

Context Zones

Using context zones to divide the corridor into distinct areas is an important step to gathering more targeted feedback from the public and stakeholders, and also allows for more focused recommendations that can better address specific needs in different zones, rather than having overarching recommendations for the entirety of the Corridor Study Area.

Context Zone A Bonds Grove Church Road to Carindale Road

Description

Zone A is the northernmost section of the Corridor Study Area and is bordered by the intersections with Bonds Grove Church to the north, and Carindale to the south. The majority of intersections in this zone are with rural two-lane roads that serve low-density single family homes. Bonds Grove Church and Gray Byrum act as important connections to Providence (NC-16) to the east.

Key Intersections

- Bonds Grove Church
- Gray Byrum

Considerations

- Gateway potential for Waxhaw from west and north (Indian Land, Fort Mill, Ballantyne)

Context Zone B Carindale Road to Twelvemile Creek

Description

Zone B is the middle zone of the Corridor Study Area and is bordered by Carindale to the north and the bridge over Twelvemile Creek to the south. This zone is most notable because of the intersection with Kensington, which is the only signalized intersection currently along the Study Area and serves as the primary east-west connection to Providence. The bridge at Twelvemile Creek has potential to be a bottleneck point should traffic volumes increase along the corridor.

Key Intersections

- Kensington

Considerations

- Major intersection at Kensington
- Potential bottleneck point at Twelvemile Creek

Context Zone C Twelvemile Creek to Helms Road

Description

Zone C is the southernmost zone of the Corridor Study Area and is bordered by Twelvemile Creek to the north and Helms to the south. This section of Waxhaw-Marvin leads into Downtown Waxhaw for travelers going south. Pine Oak acts as another east-west connection to Providence and Helms provides connection to Waxhaw Highway (NC-75).

Key Intersections

- Pine Oak
- Helms
